Selling beats online consistently can be a huge task for most online music producers.

It's not easy to get music artists flooding your website when you're first starting out.

Actually, it can be a pain in the ass driving traffic to your beat selling website.

But... There are some great tools that can to help you get more traffic.

And, for those who don't have a beat selling website yet, there are also tools that can help you create one fast.

Today, I will be revealing the top 15 tools that I use to consistently sell beats online every single month.

These are the tools I use to build and run my beat selling business, from my email management service provider, beat players, blog post tools, and website creation tools to social media traffic generating tools.

All the tools needed to blow up this year

Tools to Create Your Own Beat Selling Website

[WordPress](#) – If you own a website, then you must have heard of WordPress. WordPress is the best website builder online today and the best part about it is that it's FREE. We use WordPress in conjunction with optimize press to build beat selling websites in minutes – and you can too!

[Bluehost](#) – If you're going to [create a beat selling website](#), you will need a hosting service for that website. Bluehost is a cheap, affordable hosting company that will fit your needs. In addition, the WordPress site builder is already inside the bluehost panel.

[Optimize press](#) – This is my favorite tool for creating quick websites, opt in pages, membership sites, sales pages, and more. Use this plugin along with WordPress and it will make it really simple to create sales pages for your beats in a hurry without paying thousands to a website designer.

[Myflashstore](#) – This is the best service for uploading and selling your beats on autopilot. They do all the transactions for you and have added tons of new features that are really great. All you have to do is upload your beats and copy the html code of the beat player to your website and you're ready to sell beats.

Tools to Sell Beats With Email

[Aweber](#) – By far the most important tool that I use to promote my beats, product, and services is Aweber. This should be the first step you take for your business if you want to sell beats online at a consistent rate. Start building that email list from day 1 and use a service like Aweber to manage your list of email subscribers.

[Content Upgrade Pro](#): Are you using your blog to sell beats? If so, this WordPress plugin is a must have to add new music artists to your email list using pop up/opt in forms throughout your blog post. This is like a mini version of leadpages but without the high cost of the \$37 per month fee. Try it out; it's well worth the small investment.

Turn up to **30%** of your readers into email subscribers

Create "bonus content" within your articles,
that makes people subscribe to your email list

Hello,

I'm Tim Soulo, the creator of **Content Upgrades PRO** plugin.

Like you, I'm obsessed with growing my email list, because that is my most valuable asset as a blogger and online entrepreneur.

And I was blown away by a new lead generation tactic introduced by a few authority bloggers in 2014.

It's called "content upgrades".

You put a piece of bonus material into your article, and make people give you their email address in order to get it.

Tools for Testing and Tracking

[Google Analytics](#) – Get a deep insight into your website visitors using google analytics. You can – and should – find out where your traffic is coming from, what pages they are clicking on, and how long they are staying on your website. You can also set up website conversions with google analytics.

[Adtrackz Gold](#) – Adtrackz is one of my favorite tools for tracking my conversions for my beat pack products, music promotion services, drum kits, etc.

If you're doing paid advertising using Facebook, banner ads, solo ads, or google adwords you will have to track all that traffic to see which one is bringing the most sales and subscribers. It also provides additional data that is hard to track using google analytics.

[Accurank Tracker](#) – My favorite tool for tracking all my keywords that I'm trying to rank for on google. This tool will help you take a look at what keywords you need to work on to get to that elusive first page on the google charts.

ACCURANK TRACKER HOME LEARN MORE SUPPORT

Simple, Accurate, Affordable Rank Tracking!

100% Accuracy Guaranteed or your Money Back

AccurankTracker saves you time and effort by checking the rankings of ALL of your websites with the click of a button and with no restrictions or pricing upgrades! You can rest assured that the rankings you are shown are the true rankings of your websites, guaranteed or your money back! But don't take our word for it, watch this video to see it in action! <-->

Get it Now! Learn More

Precision Accuracy Guaranteed
AccurankTracker uses a very small amount of resources from your own computer in order to provide 100% accurate rankings that you can verify at any time by simply checking the ranking yourself manually. Precision Accuracy is Guaranteed or your money back!

Unlimited Websites & Keywords
Unlike other rank trackers, we do not limit the number of websites or keywords that you can track. Use AccurankTracker to keep track of one site or hundreds, it's totally up to you. No restrictions, no fine print and absolutely no limits, guaranteed!

Multi-Country Support
You can also select from any other country that the top search engines support and track rankings using that modifier. This can be set on a website and keyword basis, so you can track rankings for one site/keyword in one Country, and others in another Country if you like.

Social Media Tools I Use to Sell More Beats

[Bufferapp](#) – Do you spend most of your day on social media trying to sell your beats? I don't and it's because I use this app to send my tweets, Facebook updates, Google plus, and LinkedIn posts on autopilot.

Pre-schedule all your updates for a week. It only takes a couple minutes a day and, believe me, you won't have to worry about spending most of your time on social media.

[Manageflitter](#) – This is my new bread and butter way to manage all my twitter accounts. We have over 200,000 followers on twitter and are still growing every day.

If you're not on twitter trying to sell beats, you are missing out on one of the best traffic generating sources for a beat selling business. Manageflitter makes it simple to follow and unfollow targeted twitter users manually.

[Tweet Attacks Pro](#) – TAP does the same thing that Manage flitter does, but does it on autopilot. If you don't have the time to follow and unfollow users every day, then tweet attacks pro is the software that will help you grow your fan base on Twitter without lifting a finger. Just create your settings and let the software do the job for you.

[Click to Tweet](#) – If you're creating great content on your blog, having click to tweet boxes throughout the [articles](#) is a great way to get the visitors to retweet specific quotes from your article.

[Post Planner](#) – Want to promote your beats everywhere on Facebook? Then post planner is the tool to get the job done for you. Schedule posts for your pages and groups. It's like having a Facebook marketing team behind your music production business.

[Tube Assist](#) – This is the tool I use to rank all my YouTube videos. Tube Assist will help you get more views and subscribers on YouTube. Those inside traffic for beats already know how I use this tool on a daily basis to generate tons of traffic to my beat selling website.
